

BLUE MOUNTAIN CHILDCARE DATA ANALYSIS DASHBOARD

503 parent responses were collected across Blue Mountain Childcare's 5 Australian regions between April and June 2025, and analysed for extracting CX insights for the NPS management program. It serves as the source data behind every insight presented in the **Quarterly Business Review**.

The dashboard contains the following tabs:

Tab	What It Shows
Master Sheet	All 503 records including NPS score, NPS label, verbatim comments, improvement comments, category satisfaction scores, region, center, room, tenure, and post-survey response status
NPS Score per Category	Average satisfaction score (1–5) for each of the 6 experience driver categories overall
NPS Score Analysis Overall	Overall NPS breakdown — promoter, neutral and detractor counts, percentages, and average NPS score
Region wise NPS	NPS label distribution by region; promoter, neutral and detractor count for each state
Post Survey Analysis Overall	Post-survey response status breakdown nationally and by NPS label group
Region wise Post Survey Status	Post-survey response status broken down by region — showing where follow-up is happening and where it is not

From the data analysis, following insights were found, which are represented in the dashboard:

- SA NPS of **-10.88** vs overall **+40.8**, showing a steep gap of 51-points
- Director & Educators is the lowest-rated category nationally at **3.61/5**
- **65%** of all responses have no follow-up action recorded (**Status: None**)
- Victoria leads both NPS (**+64.1**) and closed response rate (**6** closures vs **4** for all other states combined)

- The satisfaction score for Directors & Educators among detractors is at **1.82** – abysmally low, indicating serious investments to be taken in improving the educator and staff quality.
